CIRCULAR

Sub: Scheduling of Regular and Optional Semesters - Reg

In view of water shortage, hot climatic condition and power shortage, it has been decided to give a long summer vacation of approximately two and half months (May – mid July). Therefore, the regular Winter Semester for 2018-2019 will commence immediately after the Fall Semester 2018-2019 (as implemented during AY 2017-2018).

However, the following features are added:

1. There will be a winter vacation for about two weeks (around new year time).
2. Two summer terms during the Summer Vacation period are included. By accommodating two summer terms, there will be no loss in the opportunity for the students to re-register for the courses.
3. The Fall 2018-19 Semester will commence from mid-July and the subsequent Winter Semester will commence from the first week of December.

These changes will come into effect from the ensuing summer term. Details of the Academic Calendar and the number / type of courses that can be registered during the summer term will be informed later.
